Date: April 2026

PROJECT OVERVIEW

Project Name	ArcPulse
Company	Brick60
Application Type	Internal brand monitoring tool — welding industry
Operator / End User	Single operator (CMR Fabrications); no public-facing product

PURPOSE & USE CASE

ArcPulse monitors Reddit for mentions of CMR Fabrications products, relevant welding conversations, and competitor activity in niche welding communities (e.g., r/welding, r/weldingadvice). The tool surfaces threads where a human operator may choose to respond or engage. No automated replies are posted — all community interactions are initiated manually by a human.

TECHNICAL IMPLEMENTATION

Access Level	Read-only. No write, vote, or account-management endpoints used.
Endpoints Used	<code>r/{subreddit}/search</code> <code>r/{subreddit}/new</code> <code>r/{subreddit}/hot</code> <code>/search</code>
Rate Limiting	Scans run at most once every 15 minutes via Cloud Scheduler. Each scan respects Reddit API rate limits (60 requests/min OAuth limit). Exponential backoff is implemented on 429 responses.
Authentication	OAuth2 with dedicated script-type app credentials. No user account impersonation.
Infrastructure	Google Cloud Run (serverless); source available at github.com/Brick60/arcpulse

DATA HANDLING

Storage	Post metadata (title, body, author, URL, score) stored in private Google Firestore. Access restricted to the single operator account.
Retention	Data retained for internal reference only; no defined expiry. Operator may delete at any time.
Third-Party Sharing	Data is never sold, shared, published, or syndicated to any third party.
Personal Data	Reddit usernames are stored solely to attribute community context. No PII is collected beyond what is publicly visible on Reddit.
AI Processing	Post content is passed to Anthropic Claude API for relevance classification. No content is used to train models. Anthropic's standard data-processing terms apply.

HUMAN REVIEW & COMMUNITY STANDARDS

All content surfaced by ArcPulse is reviewed by a human operator before any action is taken. No replies, votes, reports, or other interactions are ever generated or submitted automatically. The tool is strictly a read-and-surface system. The

operator is bound by Reddit's Content Policy and Moderator Code of Conduct and will not use the tool to spam, manipulate, or astroturf any community.
